EDUCATION

University of Toronto Scarborough Honors Bachelor of Science (Co-op) in Computer Science <i>Specialist in Software Engineering</i> - University of Toronto Entrance Scholarship (\$7,800 renewable) Relevant Coursework: Engineering Large Software Systems, Web Programming, Numerical Algorithms, Data Structures & Algorithms, Operating Systems, Database Systems	<i>Expected Graduation: June 2028</i> <i>Sept. 2023 – Present</i>
---	--

TECHNICAL SKILLS

- Programming Languages:** Python, Java, C, JavaScript, TypeScript, SQL, Racket, Haskell, Prolog, Scala
- Frontend:** React, HTML, CSS, Responsive Design, Context API
- Backend & Cloud:** Node.js, REST APIs, PostgreSQL, Firebase (Firestore, Cloud Messaging), GCP
- Tools:** Git, Linux, CI/CD, VS Code, Docker, Jira, Postman

PROJECTS

TaskMate: AI-Powered Task Manager | React, TypeScript, Firebase, Gemini API

- Engineered AI-driven task manager converting voice notes into energy-sorted tasks using Google Gemini API
- Built reliable push reminders via Firebase Cloud Messaging & serverless functions for background delivery
- Secured backend architecture verifying Firebase tokens to protect API keys; deployed on Netlify with CI/CD

Planetze Sustainability App | React, Firebase Firestore, Agile/Git

- Developed a low-latency carbon footprint tracking system under strict Agile sprint schedules with code reviews
- Architected modular, stateful React components integrated with Firestore to optimize UI render times and backend sync

Social Network for Stocks App | Node.js, Express, PostgreSQL, REST APIs

- Built end-to-end full-stack architecture enabling users to build shareable stock portfolios and analyze investment risks
- Implemented JWT authentication and authored complex PostgreSQL queries/functions for price prediction analytics

Financial Budgeting and Advice App | React, Node.js, PostgreSQL, OAuth 2.0

- Led 5-person Scrum team as Documentation & Systems Design Lead, managing Jira workflows & burndown charts
- Engineered a secure authentication pipeline using OAuth 2.0 and JWT, applying Dependency Inversion to decouple infrastructure
- Delivered an asynchronous real-time spending analytics pipeline, increasing unit testability and platform portability

EXPERIENCE

Technical Marketing & Engagement Assistant University of Toronto - Managed cross-channel digital communications and targeted newsletter content using Microsoft Outlook and Word - Designed Excel tracking templates to clean, analyze, and visualize campaign metrics, boosting newsletter open rates	<i>Sept 2025 – April 1</i> <i>Toronto, ON</i>
Web Manager and Marketing Assistant – UTSC ARISE University of Toronto Scarborough - Developed and maintained a custom React-based website, improving stakeholder communication and site navigation efficiency - Analyzed traffic metrics to optimize content workflows, increasing event registration conversion rates across the student body	<i>June 2025 – Present</i> <i>Toronto, ON</i>
Vice President – Create UofT University of Toronto Scarborough - Directed marketing operations, prioritized backlogs, delegated deliverables, and established campaign timelines - Achieved a 100% on-time execution rate for all campus marketing campaigns while maintaining unified brand messaging	<i>Sept 2025 – Present</i> <i>Toronto, ON</i>
Freelance Web Developer Self Employed - Delivered custom web solutions for small business clients (Home Inspection, Culinary, Portfolios) across the full SDLC - Optimized page load performance across devices, implemented SEO, and increased client inquiry rates by 100%	<i>Jan 2024 – Present</i> <i>Toronto, ON</i>
